

Lecture Series on Indian Knowledge System

At Smt. S. I. Patel Ipcowala College of Education, Petlad

As a part of our academic enrichment initiatives and in alignment with NEP 2020 and NAAC recommendations to promote Indian Knowledge Systems (IKS), **Smt. S. I. Patel Ipcowala College of Education, Petlad** organized a **Lecture Series on Indian Knowledge System**. The event aimed to sensitize B.Ed. trainees towards the rich legacy of India's indigenous knowledge across education, culture, science, and philosophy.

This series featured distinguished scholars and practitioners from various fields who delivered thought-provoking sessions on themes such as:

- **Ancient Indian Education System and Gurukul Traditions**
- **Contribution of India to Mathematics, Astronomy and Ayurveda**
- **Philosophical Foundations of Indian Knowledge: Vedas and Upanishads**
- **Relevance of Indian Values and Ethics in Modern Education**
- **Folk Knowledge, Indigenous Arts and Oral Traditions**

The sessions not only bridged traditional wisdom with contemporary education but also inspired teacher trainees to integrate Indian perspectives into classroom teaching and life.

Students actively participated through Q&A rounds, reflective writing, and presentations, demonstrating increased awareness and appreciation for India's cultural and intellectual heritage. The event was documented and feedback was collected for quality enhancement.

The IQAC ensured academic rigour and relevance through pre-planning, speaker selection, and post-event analysis.

Such initiatives embody our **institutional distinctiveness** in promoting value-based education and holistic development, aligned with **Criterion I (Curricular Aspects)** and **Criterion III (Research, Innovation and Extension)** of the NAAC framework.

***This was not the end it's just a beginning of new Era of Indian Knowledge
Ruling the World!!!***
